

Step 4 : SQL Queries

First of all I opened SQL Server Management Studio and Connect it. Then SQL Queries for business insights. Here are the steps

1. Create Database which is Project 3
2. Create a table name is Inventory_Tracking
3. Insert all values from the table
4. Display all records
5. Total Inventory Quantity
6. Total Inventory Value
7. Products Below Reorder Point
8. Products Requiring Reorder
9. Total Quantity by Product
10. Inventory Value by Product
11. Supplier-wise Quantity
12. Average Lead Time by Supplier

I have collected business insights above all methods.
